

# Columbus Parks & Recreation is recruiting for its new Greenpower Racing Teams!

Greenpower USA is a premier Science, Technology, Engineering, and Mathematics (STEM) program that provides young minds a hands-on, project-based learning experience that is engaging and builds critical skills. The Greenpower Electric Car Challenge was founded in 1999 in the United Kingdom with the goal of enhancing the teaching and learning of STEM through a highly engaging and inspirational design-build-race competition. The Greenpower Challenge has a major emphasis on sustainable, multi-disciplinary, and cross-curricular applied-learning.

Greenpower supplies teams with a car building kit which can be used to build an electric race car in school, college, or other organizations and then raced at Greenpower organized events.

Completing the car build will require members specialize in different rolls to contribute to the team. Some rolls focus on building and engineering or event specific positions such as drivers or pit crew. Other rolls will require PR and media skills plus public speaking to present information and data. Team members will learn how to be both well prepared and how to adjust to immediate changes. In the process of implementing and evaluating the effectiveness of these changes, members learn that they must work together for their team to be successful.

Information and team application forms can be requested from the Greenpower Program Coaches.

## **F24 Division (Grades 6-8)**

Coach Samuel Manning  
Northside Recreation Center  
2010 American Way  
Columbus, GA 31909  
(706) 641-5940

Manning.Samuel@columbusga.org
